## Work Experience

### Condueet Technologies - Web Developer Intern

October 2023 - current

Remote

- Actively engaged in web creative design and development.
- Collaborated with a cross-functional team of frontend engineers, product designers, and backend engineers to develop a pension fund web application.
- Took the lead role among frontend engineers, coordinating efforts and ensuring seamless integration of frontend components.
- Implemented user-friendly UI/UX designs adhering to product specifications.
- Facilitated seamless frontend-backend data flow and integration
- Utilized modern web frameworks (React, Tailwind) for responsive UI development.

## Projects

### EasyMart - Creator

- Developed a full-featured e-commerce platform, Easymart, utilizing Next.js with server-side rendering, API routes, and dynamic routing.
- Implemented authentication via google and credentials-based login and Stripe payment integration.
- Optimized performance and leveraged Next.js best practices.

### Movie Empire - Creator

- Built a movie website with Next.js.
- Developed front-end with React.js, TailwindCSS.
- Created Mobile Responsive User Experience.
- Integrated with APIs to search for movie based on titles or genre.
